

Object: Updating of children's regular vaccination that have a vaccination booklet from outside of the province of Quebec, including Ontario or from another country

Dear Parents,

The school nurses offer a service to all parents of children having received one or more vaccines outside of Quebec. This service allows the complete analysis of the vaccination booklet (record) of your child.

The interpretation of a vaccination booklet from outside of Quebec is a complex process. Thus, each vaccine must be identified and validated according to the norms established by the Quebec immunisation protocol. After the analysis, the nurse can proceed to the updating of the vaccination if necessary.

If you are interested by this service, you are welcome to send a copy of your child's vaccination booklet to the following address:

07.infirmieresscolaires@ssss.gouv.qc.ca

Once the analysis completed, a nurse will communicate with you. When sending your email, it is important to include:

- last and first name of the child
- Name of the school
- date of birth
- complete address
- phone number to reach you and email address
